

NuDoors is an American made company located in West Berlin, New Jersey. We are committed to manufacturing superior paint grade 1-piece cabinet doors for both contractors and homeowners. From a variety of different profiles and finishes, the possibilities are endless.

@Paint Ops

With the use of HDF, these 1-piece paint grade doors have many advantages over the typical solid wood.

Some benefits of nuDoors replacement doors are

- No cracking
- Moisture resistant
- No bridging
- Smooth paint finish

Here's what some of our customers have said:

I am very impressed with the quality of nuDoors hdf doors and drawer fronts. Ordering from them has been a huge boon to my company's profitability, not to mention the increase in the quality of the built-in cabinetry that I provide my customers. Their customer service is fantastic and, perhaps most importantly, their turnaround time is lightning fast. I wish I made the leap to nuDoors much sooner. Would highly recommend. Excellent company! - Stanislaw Woodworks

I can't say enough good about this company. Great to work with the employees plus the product is amazing. To have a solid HDF door is amazing on the east coast with the constant weather changes. I look forward to use this product in more designs! - Eric Dillman Designs

NuDoors is the way to go! The customer service is amazing, too. They've made me plenty of doors to use as paint sample doors. They're very well made and stand up to the abuse of customers and kids. Sometimes, they sit on their counters for months while they're deciding on a color scheme. Coffee gets spilled on them, crayon, whatever.. they clean right up for the next customer. Highly recommend. - NAK Cabinet Painting
